

# Dome Reflectors

Next Best Thing to Nature!

**Recommended to be used with Reptile One's comprehensive range of Heat Lamps. Go to [www.reptileone.com.au](http://www.reptileone.com.au) to view our full range**

The Reptile One Dome Reflectors are designed to direct heat and light produced by a heat lamp towards an intended basking site.

These reflectors are a high quality metal dome reflector with an E27 screw type ceramic, heat resistant socket that will suit most reptile lamps including the range of Reptile Ones heat lamps.

## Suitable for: Reptiles and Amphibians

### FEATURES & BENEFITS:

- Prevents reptiles from coming in contact with heat lamp element
- Reflective surface in the dome maximizes the heat lamps energy to a chosen heat zone
