

Internal Heat Lamp Holder

Next Best Thing to Nature!

The Reptile One Internal Heat Lamp Holder is designed to provide a secure mounting point for your Heat Lamp on virtually any surface.

The Internal Heat Lamp Holder is specially designed to be used with a Heat Lamp Dome Reflector, and is ideal for Lizards and Turtles.

Internal placement of the Heat Lamp increases heating efficiency within the terrarium.

FEATURES & BENEFITS:

- Easy installation with new generation Reptile One Terrariums
- Suitable for non Reptile One Terrariums, slight modifications will be required.
- Provides a secure mounting point to the heat lamp reflector
- Keeps heat source away from timber surfaces to avoid damage

Suitable for: Lizards and Turtles

NOTES, HINTS & TIPS:

- Please refer to the Internal Heat Lamp Holder instructions as some modifications may be required.
- A Drill may be required for mounting screws for non Reptile One Terrariums or older generation Reptile One Terrariums

WARNING AND DISCLAIMERS:

- Heat Lamp Dome Reflectors are not suitable for Arboreal Snakes, Geckos and Amphibians. It is recommended that a Reptile One Heat Lamp Cage is used instead.
- CAUTION Internal Heat Lamp Holder may become hot, be sure to let the internal heat lamp holder cool down before handling
